

Mines of the County

The Mohave Gold mining company is working a force of men on the Mid-nite mine, near the Ramevelt group, and is getting good gold ore. The ore being found in the shaft is a sulphide, something different from the usual run of ore in the district. It is proposed to push the shaft down to a considerable depth. On the J. B. Lane, to the south of the Leland, the same company is sinking a shaft in rich ore. The ore vein is about 18 inches in width and carries in the neighborhood of 100\$ to the ton. On the Leland and Mitchell the company is stopping out a fine grade of ore. The mill is working ten stamps and turning out considerable bullion weekly. With the opening up of the new ore bodies in the outside mines and the operation of the cyanide plant the mill will be run to its full capacity.

A wagon road is being graded from Vivian to Silver Creek, thence to the Barlock and Black Mountain mines to the north. The road reaches the Barlock and Black Mountain mines, but there is about one-half mile to be completed on the Vivian end of the route. The building of the road will be of considerable advantage to the operators and miners in the Silver Creek country. Although the road is over heavy grades a little work in the future will modify and make it quite passable. So far the people of the two camps have put up the money to carry the work through, but it is expected that Needles business men and the supervisors should help complete the grade.

Dr. Slocum, who is working the Barlock property, near Silver Creek, under bond, has sunk a shaft to a depth of 50 feet, from the bottom of which a crosscut shows up 20 feet of ore carrying a value of 25\$ to the ton. The vein has been cut in various places and gives results from 20\$ to more than 15\$ to the ton. Dr. Slocum is prosecuting work on the mine vigorously and is sure to develop it into one of the greatest mines in the district.

A. I. Richardson is working a small force of men on the Enclinal mining claim, north of Silver Creek, and is showing up a small vein of ore that runs 100\$ to the ton in gold. He intends to work several men on the Black Mountain property. The mines of the company are among the best in the Silver Creek country.

I. M. George, Ed. Shaw and Ed. Irving have located the east extension of the old Moss mine and have found some good ore. It is their intention to sink their location shaft to a depth of forty feet at once, and if it proves up all right arrangements will be made for further work.

The old Rattan-Ruth properties, below Silver Creek, are about to be worked by the Premier Con. Mining company. The Rattan is equipped with an excellent hoisting plant and it is proposed to develop the mine to a depth of 500 or more feet.

The Minnesota Connor mill is now running on ore from the combined properties. It is proposed to supply the lack of water at the mill by pumping water from the Merrimac mine and a plant will soon be installed for that purpose.

J. R. Livingston, Gold Road's postmaster, has located a mining claim to the west of the Homestake, in the Silver Creek country, and intends to do considerable work on it. The claim shows up several good looking ore chutes.

William Heimrod will probably take a position with a mining company over on the Mojave desert. Mr. Heimrod is an excellent mill man and will have charge of a large plant.

W. E. Heck, formerly of Prescott, is operating a mining property in the Boundary Cone country. It is reported that the mines show good values in the outcrop.

Wakeful children.

For a long time the two year old child of Mr. P. L. McPherson, 59 N. Tenth St., Harrisburg, Pa., would sleep but two or three hours in the early part of the night, which made it very hard for her parents. Her mother concluded that the child had stomach trouble, and gave her half of one of Chamberlain's Stomach and Liver Tablets, which quieted her stomach and she slept the whole night through. Two boxes of these tablets have effected a permanent cure and she is now well and strong. For sale by H. H. Watkins.

Last Thursday morning E. S. Osborne left Needles in a flat boat with six tons of freight for his camp at Parker. He was joined in the trip at Topock by Mr. and Mrs. Wardwell, of Los Angeles, who are interested with Mr. O-borne in the mining properties, and together the party went down the river. Messrs. O-borne and Wardwell purchased a group of mines on the lower Bill Williams Fork, and have been working a force of men on them. One of the veins outcrops along a hillside for several hundred feet and along this outcrop 151 holes have been drilled to a considerable depth and were to have been fired at once last night. In this way it was proposed to make a new fracture of the outcrop and show up the different ore chutes. An adit drift is being run in to tap a chute of ore, that is known to exist, at a depth of about 151 feet. The group is one of the most promising in that country.

Along the Bill Williams Fork are many gold and copper properties that will soon be taken over by capital and work started up. On the Mohave county side of the creek there are many veins carrying gold values in pay quantities. Among these are properties of Charles Price and others. With the expenditure of a small amount of capital these mines can be put on a productive basis. Water can be had in the creek for milling purposes, and fuel for many years to come is to be had in the river bottoms.

R. J. Holmes is the owner of a splendid group of mines at Silver Creek, known as the Homestake group. A great deal of work has been done on the mines and big ore is shown up. The prospect of the opening up of many other mines in that country gives added value to such big veins at the Homestake, as it will open up new milling plants, better transportation facilities and bring them to the notice of capital.

The Kennan mill on the San Cloud mine, on the lower Sandy, is almost ready to commence dropping stamps. The mines are being developed to some extent and show nice bodies of very good grade of gold ore. The company operating the properties is an eastern organization and made up of wealthy people.

Ben Blanchard is working a considerable force of men on his mining claims on Bill Williams Fork. On one of the properties three shifts are at work sinking a shaft and a big body of gold copper ore was opened up. Mr. Blanchard now has three camps on the Fork and in all the mines good ore is being obtained.

R. G. Eckis, of Cedar, who for some time past was at the head of the Cedar Valley mining company, is in Kingman. He will probably take charge of the affairs of a large California mining concern.

Inflammatory Rheumatism Cured.

William Shaffer, a brakeman of Denison, Ohio, was confined to his bed for several weeks with inflammatory rheumatism. "I used many remedies," he says. "Finally I sent to McCaw's drug store for a bottle of Chamberlain's Pain Balm, at which time I was unable to use hand or foot, and in one week's time was able to go to work as happy as a clam." For sale by H. H. Watkins.

Stockholders' Annual Meeting.

Notice is hereby given that the Stockholders' annual meeting of Tarr & McComb, Inc., will be held at the office of the Company, 407 Copp Bldg., 218 So. Broadway, Los Angeles, Cal., on Tuesday, March 15th, 1904, at 10 o'clock a. m., for the purpose of electing directors and for the transaction of such other business as may properly come before the meeting.

N. W. TARR,
Secretary.

Kingman, Feb. 5th, 1904.

Anson H. Smith has been appointed agent of the Western Iron Works, of Los Angeles, California, and is now prepared to figure with mine owners on the installation of gasoline engines, pumps and pump supplies.
